1. The drawings were received on 4/24/08. These drawings are accepted.

The IDS filed 8/1/08 represents a duplication of art already considered and cited in the previous 1449 and 892.
2. Claim 20 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 20 depends from canceled claim 8.
3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claim 20, 22 and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. Claim 20 recites the limitation "the container" and "the at least one pressure reduction absorbing panel" in lines 1 and 2. There is insufficient antecedent basis for this limitation in the claim.
6. Claim 21 recites the limitation "the border line" in line 2. There is insufficient antecedent basis for this limitation in the claim.
7. Claim 23 recites the limitation "the slender container body part" in lines 1 and 2. There is insufficient antecedent basis for this limitation in the claim.
8. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Art Unit: 3781

9. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Iizuka et al '604.

10. Iizuka et al teach a synthetic resin container with a container body part 7 and bottom part 6 with at least one pressure reduction absorbing and grip panel in the container body part. The panel includes a border line 18, 19, 20, 21 between the boundary of the panel and body part, Note the single bulge 18 located at the boundary between the top side of the pressure reduction absorbing panel and the body part with the bulge being oriented toward the bottom part so that the width is larger at an upper side than a lower side. This is considered to inherently restrict resin accumulation due to its orientation.

11. Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

12. Claims 1-7, 17-19 and 22 are allowed while claims 8 and 11-16 have been canceled.

13. Applicant's arguments with respect to claim 9, 20, 21 and 23 have been considered but are moot in view of the new ground(s) of rejection.

14. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
